

Cobble Cobble

The old saying that the cobbler's kid has no shoes has taken a rooted response in Kittery. The Cardboard Cobbler pop up stores are now operating right here in Kittery.

Its a unique answer to daily footwear said Geppeto Artisto, developer and co founder of the Cardboard Cobbler stores. We can make a pair of tie up boots in less than five minutes and with a burnish of real shoe polish, the shoes escape the eyes of discerning people.

One pair will last three hours in rain or all day in normal weather. For \$3.99 you get the solace of new shoes with an American flare that even has Converse doing back flips. International Shoe representative Arnold Crockmore exclaimed the international shoe organization is stunned by the recycling of banana boxes into shoe-ware. "If we thought we could have gotten away with making cardboard shoes we all could be zillionaires today!", he exclaimed in a pressed but authentic response. He went on to remark, "This guy, this guy.. he is incredible ..." Shaking the snow off his new handmade in America cardboard boots. They are quite comfortable, he said. They seem to feel like you are walking barefoot over hot coals or broken glass, but you can see your feet are covered and protected. Its kind of weird he noted, but the entire shoe industry is getting into step with the idea.

Shoes for an hour, shoes for the day, a simple solution to today's expensive long lasting footwear!

The town of Kittery is now planning a special, out of this world license, to provide the cardboard cobblers permission to ply their trade right in front of homes and businesses so people can literally exit barefoot and within a few moments be re-shod in a stylish but eco-friendly footwear solution.

Some cardboard cobbler shoes have been seen as far away as the space station and eastern Uzbekistan, both which border the actual end of known civilization, So its a natural development that these shoes would become popular in the more domestic setting of Kittery!
