

The 5¢ Miracle.

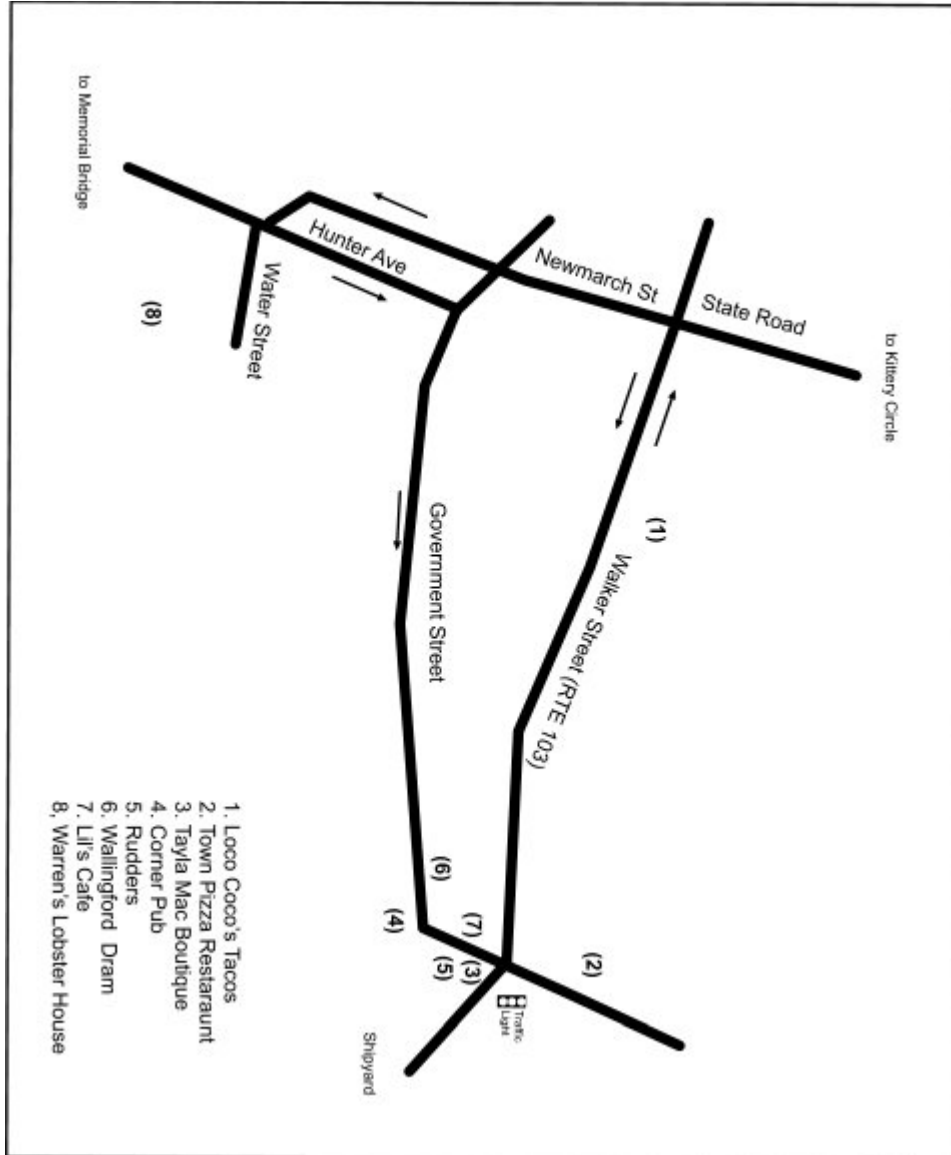

A new company is coming to Kittery. Vast opportunities await for the first 400 employees. The company is an off shoot of the well known Yakalot Corporation, and is setting new heights for achievement. Our own Viva Kittery reporter Anatolia Regretski is covering the story.

Reporting here, Anatolia stated, at first I was covering new deep space teleportation companies and stumbled onto this new faction. I was so impressed I immediately became an investor; now I work from home and roaming about aimlessly , literally raking in the 'dough'!!

The name of the company is Procrastinator Corp, their motto and service is the same, "Creating Solutions for Today's Problems Next Week!!"

So here's how it works, the inner dynamics if you will; you simply identify a "problem" that either you have or a problem endemic to the world. Then you make a simple 5 cent donation with your firm commitment (weekly) .. to "get going on it" next week. So far this corporation has identified about a million problems. "It's incredible" said Anatolia. Out of the list of a million problems I chose "drinking" as a problem to work on next week. My life has become overwhelmingly awesome as I go to the bars with my "almost free money" and help people choose from the list provided by

Procrastinator Corp. I have helped about 350,000 people this year alone and am looking for the million mark by 2025. Its better than pretending to "do" real estate. The most remarkable problem I helped a person identify was getting "the flies out of the ointment!" ... I saw the fellow at a bar last month and he is still chipping in 5 cents to stay committed to this unique problem. Anatolia Regretsski finished the article to us by offering Viva Kittery the 5 cent solution with a next week commitment. We took up on the offer, we identified a unique problem for us, " finding a sane reporter" and are committed to solving this problem next week.
