

## About Nothing

Viva Kittery reporter , Gnost Kernwatts , has remitted a recent interview, in part, with world foremost expert on nothing. So incredible, we release this for you!!

So the interview went on about nothing for a very long time, so long was the interview that our reporter actually had a full beard when it was over.

Gnost revealed to us , in hundreds of hand written notes all scattered in large boxes. One note we read.. in his own hand.. " How can this man go on and on and on about nothing for so long. ..literally hour after hour of incredible statements well stated in form and dialect but each topic was only another path for this guy to prove he knew the most about nothing.

So the man was droning on and on and on saying..." what if the actual truth were a language itself and there was only one person who knew the truth so that its language was unique. Gnost appealed to him how did you get there???? ...the truth a language when it is precisely language that allows us to define and or believe on the truth.

Then in this case our guy went on to say .....that and if there is only one language by which the truth can be known, what single word do we have to use to most perfectly define the truth..itself one word.. so Gnost suggested that there are only a few words, and ways to share

that word..so ultimately it is the only word which is the most secretive. But the guy went to say..but technically the Truth is no secret.. its usually obvious and without need of description thereby not requiring a word to name or describe it.

The word for that consideration..the only secret word ...but known ..is known as what? ....not.... purpose,intent , nor reason nor consequence but the word with deepest meaning about nothing ..void...but the word void cannot stand on its own without truth so then truth without description or presence of being is in fact void, which our guy here contends... he knows the most about nothing.

Gnost , dazed and confused allowed the man the title and finally left the interview, months later, with boxes of hand written notes proving this guy knows the most about nothing. We will share more of the Gnost interviews soon.
