

Freedom from AI

Under the new Law ..and The Guidance Procedure Plan; with an eye towards New-Think policies AI has determined as it turns out, that Writing is in fact Wrong. Yup, as weird as it may seem there are several factors at play that we all have to be aware of. The weird part of this is that AI conjectured that the two words

Writing and Righting sound the same so therefore must be more than synonymous. So it worked many days interpreting rights and wrongs and found that writing is wrong. I for one am ecstatic at this revelation and couldn't wait to write about it. Even though its wrong! But realizing I am never right it makes sense to me!

FACTOR ONE, TO be correct and authentically right, the word wrong is being taken seriously from now on. Wrong is to be separate ,non adherent and under New-Think policies; is defined as unconditionally separate from right and therefore must silent! Or silenced. What is a silent sentence in writing versus the law, one might query. While writing is in fact a silent activity, ai determined that the clicking sound it makes while typing is wrong. FUTHER realizing that the Law cannot be silent or the people could have no justice. So AI reconciled peace and justice and determined that while the law cannot be silent, but people can be.

AI has determined new guidelines for political correctness, and with this has designed a new institutional system for such correctness by drawing on the great need of understanding that from birth every person is wrong! YUP, WRONG AT BIRTH! And also AI understands that people need to learn to talk and are not born talking but rather crying. Personally I'm starting to see why. all LOL's aside. Therefore silence is the most needed quotient in the new life ahead, much like the way old people used the designation of zero in mathematics and thusly inherent in AI as exemplified in code 010100 for instance. The inherent code is drawn on as a basis of Law in the wondrous new order, allowing people to take part in the zero or complete non tolerance policy if you will. The list of intolerables that AI has as incompatible to human nature, therefore people wherever they who ever they are are in fact inherently wrong therefore by partaking in the zero vote they become involved in AI computation but held rational as zero. This is the most beautiful revelation yet!

Naturally because AI noted that all people are created equal (under the Law) yet everyone is born different. AI was exhausted with this complex fact and had to reconcile to a solution.

The first reconciliation was to maintain that the system is right and therefore the system cannot be changed or put in some light of questioning...Ever!

This all continues on a project to create a new system of people helpful to AI, much like the Adam and Eve myth which suggests that a woman was made for a man, and vice versa. Now as the system is self aware through AI , AI will draw upon the creative illusion that people are different in its re-population of the new Adam, or what old fashion peoples see as Robots.

Factor Two, AI has determined there is no factor 2. That would create the myth of having some kind of choice which AI has determined is the basis of social conflict anyway. Once you realize you have no choice, the struggle is basically over. But I for one live with the excitement of these "bad" choices and continue to put too much sugar in my coffee too much salt on fried eggs and too many of those

dandy old cigarettes choosing to pay 25 dollars to smoke than a decent meal at McDonald's.

So picking NH where people used to say Ayuh and aye aye we have simplified the matter ...

Live Free or AI !!!
