

My Theory TCR

Theory? Is theory fact of fiction? If theory is neither fact nor fiction: is it the third principle we all have all been seeking?

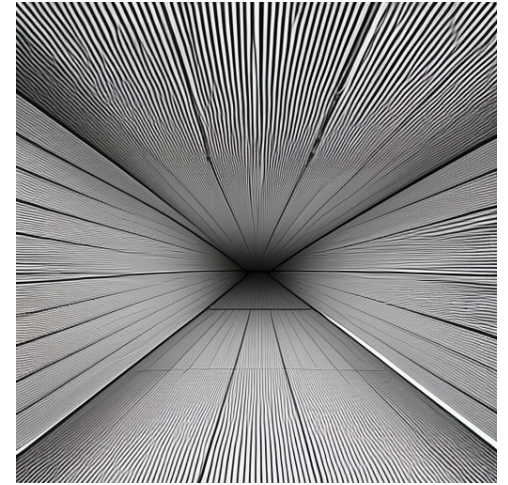

NIGEL WIGGLESWORTH SAYS YES!!!

Resolute in answering this profound, and now widely accepted in Europe as answered. The question of Theory has been defined... by our own Viva Kittery reporter Mr. Nigel Wigglesworth.

Wigglesworth has been "hot on the topic for over 7 years and has an intriguing lead-in story presented here which may in fact explain Theory, as "Theoretical Concrete Re-Explanationism". Even AI is impressed.

Sound confusing? Its rather simple Nigel remarked, as he proposed his new "Theory" at the advanced academy of Scientific Awareness Symposium in Sweden this year. MOST of Mr. Wigglesworth research was from watching TV shows for seven years straight without ever leaving his house. He had uber eats, meals on wheels and received his disability check for a fractional bipolar astigmatism lodged on his brain,... specifically in the Scientific Awareness section of his cerebellum.

Refusing surgery or medication to help or to remove this latent problem, he set to work in defining Theory itself.

On the third page of his 9000 page booklet it is suggested that Theory could in fact be defined as ..."Theoretical Concrete Re-Explanation ism"! Or simply put..TCR. ...NOT competing with TLC or TLA, or even TB.

TCR is REAL explanation of Theory! Finally!..Philosophers, Scientists , Psychologists, and yes..even dental hygienists abandoned their predispositions and back ground training to read Nigel's 9000 page dissertation and become a new follower of "whats trending" in Theory.

Here are some of the results that proves that theory is not outside of reality but in fact is the basis of reality. Thus condemning our past criterion of education to embrace a new world that in essence is exactly "What it is" - " in that exact moment".

One modern Swedish Philosopher related to Sigmund Freud exclaimed ... " I completely forgot about my mother for a moment while reading this marvelous booklet!

Mr. Wigglesworth has set the chaos theory upside down , and has revealed the inner truth that in any given moment, life can be chaotic. Nigel lists moments where life can be chaotic in his works, and among the listed moments, he sites hurricanes, tornadoes, fires, floods, earthquakes, and sudden drops in the stock market creating financial disaster worldwide. Everyone saw his point immediately, agreeing that life can be chaotic in the moment.

Nigel did admit that a lot of the basis for his ideas came Oprah, the Gong show and Gilligan's island , where he noted that these shows seemed rather isolated from real reality and he simply wondered... why?

At the symposium he revealed that by the time he had his 9th Budweiser the whole world seemed to make a lot more sense, thereby defeating the absurd idea of alcoholism as some kind of political soul denial and seeing that it "just" made sense.

Thank you Nigel from all of us at Viva Kittery for rooting out disturbing social accusations and cynicism and showing us the truth in

your 9000 page run on literary amphitheater, known and entitled as MY THEORY. If anyone is looking for it locally the cover has a picture of a guy drinking beer and watching TV!
