

## Assimilated Greed

OUR own Viva Kittery reporter T. V. Thompson has released the first of a series of interviews with "real life" star trek people.

The interviews will be published as well as these real life interviews that seem to share unique aspects of shows on television.

First off our reporter asked... is there a real captain on the ship you travel in, or.. in essence is your species more like a free spirited group with no real defined authority or purpose?

The response was immediate, shocking and revealing about these aliens... We are a group with no real purpose or authoritarian structure. We simply are traveling, finding what we find and acting how we act. So you are more like real human beings but without the pompous virtue signaling of authority and social meaning? Yes basically..

This is where T. V. jumped into action with the next question... Does the BORG or an entity like it exist and do they assimilate endless species and destroy all life in their wake? The response.. was .. Yes and No..

*Lapel CAM 1: Interior of alien ship being interviewed the lower boxes are real BORG maturation chambers*

T. V. responded.. yes AND no ?

The alien went on to explain that the cosmos is inhabited by a living word..that can represent the BORG but in most cases limits its external appearance ..so in essence you can't see the "BORG" but you do see the effects.

Oh.. what do you call this entity living in the cosmos as a " living word" that does what the BORG does.

We call it The Greed! The Greed lives and conquers all those in its path by assimilation but not all species are subject to its assimilating powers. T. V. urged the alien to reveal the species not affected ..

Well basically we found that birds and turtles seem not to be affected by greed. Also worms, puppies and banana bugs. That's why we are on earth..cataloging the non assimilating species..

T. V. responded.. well that makes a lot of sense.. So have you found if there are any humans who can't be assimilated by the "THE GREED"..

The answer was shocking and revealing..in a one word response..

**NO!**
