

29 Cents Rules

What can you buy for 29 cents a minute? A lot is the answer and the new store coming to town called “Cracked or Mislabeled”. It is giving new consumers a freedom they never had. The president of the company spoke at the sight of the new grand opening... in part he says.. “ and we realized that the 16 to 98 percenters are never gonna afford to buy a house again. Ever”.

So in part is our philosophy of cracked or mislabeled... " obviously most of our merch is cracked ,wrinkled, krinkled, split,stained or slightly usedor just plain mislabeled...

See this like new couch here, pointing with an open hand.. it's labeled as "easy sofa" ...not couch... So we see a lot of merch made in non native English speaking countries, leading to mislabeling... " it's becoming almost pandemic" ... This toaster is labeled.. " crunchy bread maker' ..another label tragedy.

So it could not be "AI" approved. This meat here.. labeled " ground beouf" . Our reporter commented that's french for ground beef.. the president responded.. its mislabeled over here so it doesn't meet USDA regulations.. Our reporter said its from France its probably old by now. The president chuckled and said ..so what! .." you're no spring chicken yourself" and continued showing the public his financing

program where each is financed to spend 29 cents a minute with no monthly fees and no fancy return policies; you simply buy what you want and your account is simply charged 29 cents a minute...no matter how much you buy..no matter the item @! And your personal charges end automatically if you don't make a purchase in 6 months! "

“**Automatically**” ...he yelled enthusiastically. The whole business is computerized so there's no room for error he expounded! Our reporter thought to himself .. geeze..only 29 cents a minute and i can have anything I want perpetually.. so he whipped out his calculator, lets see..29 cents times 60 times 24 times seven times 52 . Wow..I'm in...what a deal!!!

HOW CAN SO LITTLE BE THAT MUCH!
