

Money No Best

Viva Kittery's very own "finance" reporter has written an article of delight, which bearing on the certainty of wealth itself, has "risen the brows" of the one-percent'r community!

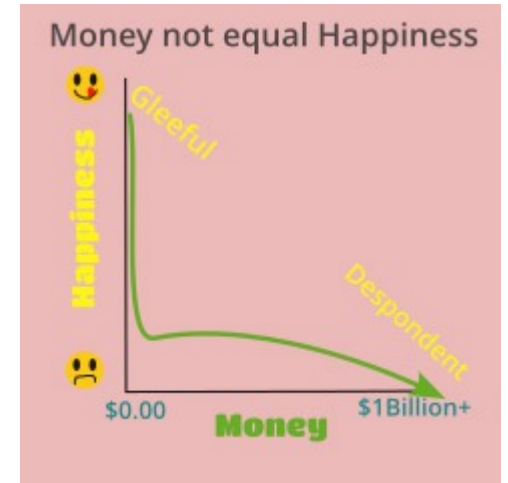

Stan Telfoltsne has contributed this article on the basis of a 40 year study of money, people, .. people without money and people who should not have money at all!! Stan reveals in his article that most people simply should not have money at all!

This astounding "fact based" research had the super wealthy doing back-flips into pools of jello!!

We are thrilled said the 41 rich people of the world. We believe that the other 7.8 billion people of the world are better off not having money!! As Mr Telfoltsne revealed his article to the "41".. as they are commonly referred to by each other... he used his "fact based money science" to reveal his findings and assure the 41 they are in fact correct..

Number one... Stan said ..when people have money they don't want to work!@! The 41 cried out... "we need workers"

Number two.. when people have money they are mean to each other..the 41 cried out.. " we are never mean!!"

Number three.. when people have money they get confused, socially disoriented and ungrateful!@ The 41 yelled out "We are grateful and we are not confused!!"

See Stan said..all fact based research.. the 41 huddled around Stan at the end of his study revelation and gave him a couple of million to get "something to wear"..

And Stan pointed out..according to Star Trek shows people outgrew the need of money anyway!!! HEAR HEAR the crowd chanted like a British Parliament moment.. yes people will outgrow the need!!
