

Smidgen

Viva Kittery's very own Food and stuff reporter.. Mike Gnosh has come up with a great story.

While studying the food industry..BIG FOOD... he came across a report the official board of weight and measures is considering as a new " law" for food.

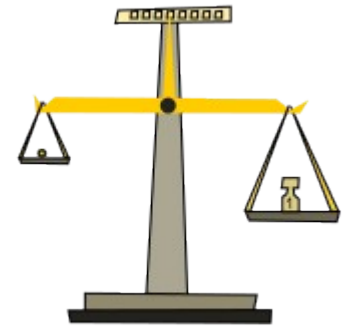

A new official weight is being considered in order to fulfill lives of certain per-centers .. the 46 per-centers.. just under the majority but enough to cover anyone with any extra money...to make life more expensive but " better" for everyone!

The Smidgen is about to be an official weight..therefore chargeable and it could cover more than Big Food a Smidgen for.. one dollar

The price for a smidgen of anything will be set at one dollar. So now instead of having to order a side of cream cheese for \$3.75 you can legally order a smidgen for one dollar! Instead of a side order of butter \$2.25 you may request a Smidgen ..one dollar.

Instead of an extra glass of milk...A Smidgen please.. and the list goes as far as a Smidgen can be applied.

We're excited about this the guy at weight and measures said... while in line getting sloppy Joe's.." high school style" .. A Smidgen more sauce please!

ONE SMIDGEN
